EDUCATION

Yaşar University

Computer Engineering

2018 - 2024

İAkademi-Microsoft Partner

Full-Stack .Net
Developer

2025-2026

SKILLS

- ASP .Net Core
- C#
- SQL Server
- ASP.NET Core MVC
- HTML5
- CSS3
- jQuery
- AJAX
- MongoDB

LANGUAGES

- English

ABOUT ME

I graduated from Yaşar University with a degree in Computer Engineering in 2024 and am pursuing a professional career in software development. My current focus areas include C#, .NET technologies, and MSSQL, with an emphasis on developing reliable, maintainable, and scalable systems. I have experience in delivering full-stack web projects as well as console-based applications, and I am proficient in modern backend development practices and various programming tools. During my internship at Adres Gezgini, I contributed to multiple web and advertising initiatives within the software development and R&D teams. Additionally, I have completed a comprehensive Full-Stack .NET developer training program.

WORK HISTORY

SOFTWARE DEVELOPMENT SPECIALIST

Adres Gezgini - İzmir - 2023

- During my 2-month internship at Adres Gezgini, I actively worked with the software development and R&D teams. I participated in designing websites for various clients and contributed to several web and advertising projects. Additionally, I gained experience in the software development processes and project management within the team.

PROJECTS

PORTFOLIO-[HTTPS://ERYDRKN.GITHUB.IO/PORTFOLIO/](https://erydrkn.github.io/portfolio/)

Special Topics In Computer Engineering VR Game Project

- I developed a VR-based survival game in Unity featuring 3D AI-driven zombies, scripted in C#. The game takes place in a dark, enclosed environment where players survive increasing waves of enemies. It includes realistic sound effects, multiple weapons, and a first-person perspective for an immersive experience.
